

Selected numbers of Wright's plants, such as are new or particularly interesting.

Gettingen, 13<sup>th</sup> Aug., 1861.

- 254. quid? insufficient.
- 1263. *Sphinctanthus lasiophorus* Gr.
- 1264. *Schradia cephalophora* Gr.
- 1259. *Hoffmannia lauculata* Gr.
- 1258, 1259. *Leptocarpus rotundatum* Gr.
- 1257. - *striatum* Gr.
- 1260, 1261. - *velutipes* Mich.
- 1262. *Festucastrum spicata* Gr.
- 1261. - *lunata* Gr.
- 1266. *Woodsonia porteri* Gr. (Sclerocarpia *laucifolia* Brit.?)
- 1617. - *rigida* Gr.
- 1258. *Menckia lygistioides* Gr.
- 1268. *Oldenlandia callitrichoides* Gr.
- 1269. *Lycia tuberosa* Gr.
- 1271, 1272. *Sparganium grandatum* Gr.
- 1250, 1278, 1286. *Chione lucida* Gr.
- 1287, 1288. - *dissecta* Gr.
- 1289. - *unifolia* Gr.
- 1267, 1268. *Citellus rotundata* Gr.
- 1249. *Myriophyllum uliginosa* Gr.
- 1282. - *tenifolia* Gr.
- 1284, 1285, 1385. - *coronata* Gr.
- 1242. - *castanea* Gr.
- 1274, 1666. *Lasiophthalma* Gr.
- 1280. - *trispicata* Gr.
- 1627. - *hebecladoides* Gr.
- 1281. - *pyramidalis* Gr.
- 1296, 1296, 1627. - *patens* Sw.!
- 1628. - *mutans* Sw.!
- 1275, 433. *Machonia microcephala* Gr.
- 1306. *Vernonia hirsutoides* Gr.
- 1307, 1308. *Lupatorium laucifolium* Gr.
- 1287. - *plumbicoides* Gr.
- 1629. - *hypoleucum* Gr.
- 303. *Miscaria hualqui* Gr. (Lup. *Haufloran* Sw., non Sw.)
- 1299. - *corymbifolia* Gr.
- 1315. *Lantana Wrightii* Gr.
- 312. *Microrrhiza repens* f. Hook.
- 376. *Salvia grandiceps* Laff.
- 317. *Calycium spicatum* Gr.

- 327. *Senecio laucum* Gr.
- 328. - *plumbum* Gr.
- 329. - *polypetalum* Gr.
- 288. *Lichum Wrightii* Gr.
- 332. *Lycia india* Gr.
- 1310. *Tupa imbricaria* Gr.
- 352, 1332. *Wellenia laucifolia* Gr.
- 357. *Arctia laucivida* Gr.
- 1334. - *multiflora* Gr.
- 349. - *jacquinivida* Gr.
- 353. *Jacquinia ruscifolia* Gr.
- 1323. *Lepta (Microcephala) polita* Gr.
- 1324. *Sideroxylon nesioides* Gr. (*Quercus patula* Sw.?)
- 1329, 1330. - *Dictonium* Gr.
- 344. *Quercus glauca* Gr.
- 1138, 1301. *Gymnocarpus cubensis* Gr.
- 1331. *Marsiphanthus caribaeus* Gr.
- 409, 611. *Haemianthus siliatulus* Gr. (*caespitium thionanth. caespitatus* Sw.)
- 1388. *Linociera abutiflora* Gr.
- 1304. *Myriophyllum grayi* Gr.
- 1386. *Ranunculus siliatulus* Gr.
- 1663. *Anediter asperigina* Gr. (Schizanthus?)
- 396, 1660. *Humulus siliatulus* Gr.
- 1664. *Thysanotus? corymbifolius* Gr.
- 1377. *Editha calycosa* Mich.
- 399. - *valenzuelana* Mich.
- 405. *Amphistichum fetiforme* Gr. (occurred in Jan.)
- 1664. *Canolobus fijiensis* Gr.
- 1375. *Marrubium campocaulatum* Gr.
- 1372. *Loxopetalum volubilis* Gr. (Cantoula *mead.*)
- 1344. *Epilobium thymoides* Gr.
- 1346. *Zonanthus cubensis* Gr.
- 378, 378. *Hemicentrus callitrichoides* Gr.
- 343. *Yunnanella purpurea* Gr.
- 394, 1349. - *viniflora* Gr.
- 1357. *Cephaelis septentrionalis* Gr. (ubi. All. *Solana* *are* *laucum*.)
- 1341. *Tecoma lepidophylla* Gr. (Hesperis *Mich.*)
- 361. *Diarrhena pycnantha* Gr.
- 1342. *Arctostaphylos hispidifolia* Gr.
- 1335. *Conoclinium corrugatum* Gr.
- 358, 1336. *Columnnea tinctoria* Gr.

I beg you to forward the enclosed note to our father Dr. Schum.

My Dear Dr. Schum,

It was such a great pleasure to me, that you had the kindness to send me your photograph, so as you expressed a mutual desire, I did not wish to thank you without returning my own, and it is only now that I succeeded in getting a tolerable one. In this case, when there is so little chance of personal meeting, this custom of exchanging photographs is invaluable, and my working-room looks more comfortable, since ever against my seat yours is constantly before my eyes, between those of both Hooker's, and below a fine engraving of H. Brown, once presented to me by Eastwick.

Professor Yarrow agrees to take Leontodon, *Cypripedium* and allied *Monocotyledonous* orders, viz. 123 specimens, marked, as you say, "Provinciales, Juncaceae, Cyperaceae, Equisetaceae, Galanophoraceae". With this parcel you may send the "2 or 3 plants" for Mr. Whittard, and I will take care to forward the plants to both gentlemen and to pay the way to Mr. H. B. K. The 4<sup>th</sup> part of my flora to Yarrow is only now forthcoming, the most of the fifth half-completed: of *Dicotyledon* I have only some to study *Juncaceae* & *Umbelliferae*, all the other *Monocotyledonous* orders having been sent, but having

Ming. It is *Allocephalus curvatus*

me often in the news with respect to limits of natural orders. One of the interesting examples of genera joining different orders is *W. w. 370*, the *Spilonia quinosa* L., which combines Solanaceae and Geraniaceae, to the latter after much hesitation I have put it. - The no. 1946, of which you furnished me with another flower, is intricately allied with *Liianthus unguis*, I have called it *Liianthus* and put a description to the journal of the Linnean society: such stipular members occur in usual *Liianthus*. - As soon as the rest of Wright's unnumbered plants is copied, I shall send it, I hope, before the end of this year. Ever yours, affectionately  
Asplenbach.

Continued record of Hartley's pl. Venz.
